

QUALITY POLICY

As part of the Modine Manufacturing Company this policy supports the Modine Quality Policy commitment to being the worldwide leader in heat transfer technology.

QUALITY POLICY:

The Airedale Group will provide products, in accordance with its published specifications and to the agreed requirements of its customers.

ACHIEVEMENT:

To achieve this policy we recognise the importance of providing a platform for continuous improvement that is shared and utilised throughout the business. It supports this policy by maintaining and operating an effective Quality System backed by fully audited and well communicated procedures. Our business is committed to the development of its structure in support of good practice and the on-going training of its staff. We further recognise the importance of user experience and how it is communicated, sharing information that will further enhance our commitment towards improving the performance of both products and customer service.

We understand we have interested parties with needs and expectations and our systems and policies support these.

This is the context of our organisation and outlined below are the principles that reflect our commitment towards achieving success.

AIREDALE PRINCIPLES:

- Consistently provide products that meet customer and applicable regulatory requirements
- Audit, monitor and measure component and product performance. Ensure appropriate action is taken to improve performance and reliability
- Audit, monitor and measure process performance. Ensure appropriate action is taken to improve the process performance
- Maintain appropriate measures to ensure all information generated to support process activities, is updated and improved
- Maintain appropriate procedures, to ensure that personnel who perform work affecting quality are monitored, developed and trained to a level of competence, which is appropriate to sustain our reputation for producing a high quality product
- Develop both the staff and the Quality Systems to satisfy quality objectives
- Maintain appropriate technical literature through all media channels, to ensure product awareness, enhancements and the effects of legislation are available to customers
- Maintain and implement acceptable levels of training for all staff as required for them to carryout work of satisfactory standard

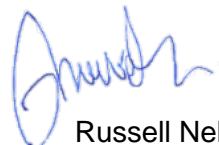

The Airedale Quality System complies with the requirements of BS EN ISO 9001:2015

In accordance with CE Marking requirements Airedale Group conform with the requirements of all applicable EC Directives.

If you have any questions concerning any of the above please contact the Quality Dept.
